

Anti- HDAC2 (Phospho-Ser394) Polyclonal Antibody

<u>Catalog No.</u>	<u>Size</u>
A100172-01	50 µl
A100172-02	100 µl

Specificity	Anti- HDAC2 (Phospho-Ser394) (human mouse)
Source	Rabbit Polyclonal
Application	WB ELISA
Form	Liquid, 1 mg/ml

Product

Swiss-Prot No.: Q92769

Other Names: HD2; histone deacetylase 2; YY1 transcription factor binding protein; YY1BP

Specificity and Sensitivity

HDAC2 (Phospho-Ser394) antibody detects endogenous levels of HDAC2 only when phosphorylated at serine 394.

Source and Purification

The antiserum was produced against synthesized phosphopeptide derived from human HDAC2 around the phosphorylation site of serine 394 (E-D-SP-G-D).

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

Application Notes

Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows:

WB: 1:500~1:3000 ELISA: 1:20000

Storage Buffer

Rabbit IgG in phosphate buffered saline (without Mg^{2+} and Ca^{2+}), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Storage Instructions

Stable for 1 year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing. Aliquot will be stable at 4°C for 3 months.

Images

Western blot analysis of extracts from 293 cells, COS cells and HeLa cells, all treated with PMA (125ng/ml, 30mins), using HDAC2 (Phospho-Ser394) antibody.
