

# Anti-Phospho-PPAR- gamma (Ser112) Polyclonal Antibody

<u>Catalog No.</u>	<u>Size</u>
A100578-01	50 µl
A100578-02	100 µl

<b>Specificity</b>	Anti- Phospho-PPAR- gamma (Ser112) (human mouse rat)
<b>Source</b>	Rabbit Polyclonal
<b>Application</b>	WB
<b>Form</b>	Liquid, 1 mg/ml

## Product

**Swiss-Prot No.:** P37231

**Other Names:** NR1C3, PPAR-gamma-1, Peroxisome proliferator activated receptor gamma

## Specificity and Sensitivity

Phospho-PPAR- gamma (Ser112)Antibody detects endogenous levels of PPAR- gamma only when phosphorylated at Serine 112.

## Source and Purification

A synthesized peptide derived from human PPAR- gamma around the phosphorylation site of Serine 112.

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

## Application Notes

Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows:

WB: 1:500~1:3000

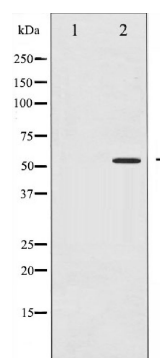

## Storage Buffer

Rabbit IgG in phosphate buffered saline (without  $Mg^{2+}$  and  $Ca^{2+}$ ), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

## Storage Instructions

Stable for 1 year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing. Aliquot will be stable at 4°C for 3 months.

## Images

Western blot analysis of PPAR- gamma phosphorylation expression in Paclitaxel treated Jurkat whole cell lysates, The lane on the left is treated with the antigen-specific peptide.
